
Driver Blue Link BL-u83g

The advertisement features a dark blue background with a glowing blue circular pattern. In the top left corner, the Blue Link logo is displayed with the tagline 'The Network Solution'. In the top right corner, the text 'Wi-Fi Equipment' is visible. The central text reads 'IEEE 802.11n (300Mbps)' above '150Mbps WIRELESS' and 'USB ADAPTER'. To the right, a slogan states 'For Wider Coverage at affordable price'. On the left, a framed certificate is shown with the text 'Rekor MURI No. 4126 KATEGORI WIFI SERI N TERCEPAT'. On the right, a black and white USB adapter is shown, labeled 'BL-U90N'.

Bauer The design of this ultra-compact DVR is similar to other high-end 1080p DVRs, but the real standout feature is the quality of its display. The front of the receiver has a 5.0" wide screen display with blue LED backlighting that is easily viewable from any angle. The display is 1280 by 720 pixels in size and can accept HDMI inputs from one or two sources. The receiver is equipped with an internal mini-HDMI input, and there are two external mini-HDMI inputs that will accept standard HDMI video sources. In addition, there are two analog audio inputs and a composite video input. Bauer The DVR's basic controls are located at the top of the receiver, and they include a power button, two pairs of forward/back buttons, and one pair of up/down buttons. The Power button allows the user to turn the unit on and off, the forward/back buttons bring up the menu system, and the up/down buttons change the channel. One nice feature of the menu system is that each button can be assigned to a different channel. So, for example, one could assign the up/down buttons to control the volume while the other pair can be set to switch between the input sources. In addition to the main controls, the receiver also has a four-way navigation pad on the front. Bauer The included Remote Control is an Android device that can be used as a remote control. It features an 800 mAh battery that can be charged by plugging it into the receiver's USB input. The remote uses 2.4GHz Wi-Fi technology and can be placed anywhere within a 20-foot range. The receiver is equipped with an advanced Wi-Fi system that includes a pair of 2.4 GHz antennas. There is also a built-in digital processor that handles the streaming of the incoming videos and live TV. The digital processor is the heart of this receiver, and it allows for two channels of high-quality DVR service. The two channels are both HD and can be set to record any type of programming. Bauer The DVR features a 400 GB hard drive that stores the recorded video, and it supports network recording from virtually any IP-connected device. Although it does not store programs as part of its programming, the DVR does give the user access to video and TV content on an internal server. The DVR also features a pair of HDMI and a
